

### **ENGINE**

- Engine Support and rubber mount condition/tightness
- Compression
- Charging system
- Exhaust system fasteners
- Spark plug replacement

### **FUEL SYSTEM**

- Fuel injection system sensors (visual inspection)
- Throttle body inspection (fault code reading)
- Fuel vents line pressure relief valve inspection
- Fuel lines, connections and fuel system leak test
- Visual inspection: Throttle body, sensors, fuel lines, fuel rail, and fittings
- Air intake silencer fit/tightness
- Fuel tank straps and fuel cap visual inspection

### **ELECTRICAL SYSTEM**

- Battery and wiring
- Check fault codes
- Electrical connection and fastening (ignition and starting system, fuel injectors, etc.)
- MPEM and EMS ECU connectors' inspection and lubrication
- MPEM mounting brackets/fasteners
- Digitally encoded security system and safety lanyard/post condition
- Monitoring beeper
- Gauges

### **COOLING**

- Hose condition and fasteners

### **PROPULSION SYSTEM**

- Impeller shaft seal inspection
- Impeller condition and impeller wearing clearance
- Water intake condition
- Ride plate inspection incl. coolant leak

### **HULL AND BODY**

- Bailer pick-ups, check for obstructions

### **Control Cable**

- Throttle
- Steering (incl. stem and nozzle)
- Reverse (incl. gate)

### **GENERAL**

- Lubrication and corrosion protection
- Reset maintenance code
