

After having fun clean you PWC in and outside.

How to flush my ski?

1. Open Seat.

2. Connect waterhose to flushkit.

3. Start engine

5. Let water run for about 2-3 minutes

6. Turn off water

7. Hit throttle 2-3 times

Try to keep the engine compartment as dry as possible. Open drain plugs, spray engine compartment with fresh water. Vacuum the rest water out of the compartment. Let the engine dry before spraying with silicone spray.
